

Hot Tub Use

We hope you enjoy using our hot tub. The key is to keep it as clean and hot as possible for your future use so please:

The bar across the hot tub is the cover lifter – please use this at all times to take the cover off and on.

Shower before and after.

Use footwear (flip flops) to keep feet clean before getting in.

Wear minimum clothing or speedo style swimwear if possible.

(Washing detergent in clothes affect water state).

Carefully replace the lid to retain heat for next use.

Things to look out for:

The slate floor gets very slippery when wet – PLEASE BE CAREFUL.

(Guests with heart problems, hypertension or infectious diseases should not use the hot tub).

Please call Mark for help if required on 07976 738556.

Hot Tub Access

Please read this disclaimer and by continuing with the booking we understand you have read and agree to the terms.

Please note that we clean the hot tub and adjust chemical levels before every visit.

HOT TUB DISCLAIMER.

The Hot tub can be a pleasurable and relaxing experience. However, for your safety and enjoyment there are strict rules and guidelines that must be adhered to when using the Hot tub. This is an important health and safety legal requirement for Hot tubs used in a holiday home environment.

The person booking the accommodation is responsible for making sure that all members of their party, and their guests, are aware of, and strictly adhere to the guidelines. Water balance/chemicals will be adjusted as necessary and results recorded. This procedure is a safety requirement for Hot tubs in holiday homes and ensures that the chemical balance of the water remains continuously safe for your enjoyment throughout your stay.

It is vital that the water is kept clean for your own safety. Failure to do so results in the water balance changing which seriously diminishes the effectiveness of the sanitising chemicals. This in turn can lead to nasty microbiological bacteria multiplying rapidly causing a number of serious hazards to user's health.

Please take a shower and use the toilet prior to entering the tub.

Do not submerge your head under the water, do not drink the water, or allow the water to enter your mouth.

Failure to maintain clean water may result in the need to drain down, sanitise, and re-fill. Guests should be aware that failure to maintain this requirement could result in a charge to cover the cost of draining down and cleaning of the hot tub. Approximately 24 hours plus will then be required to return the tub to a comfortable temperature.

Please report any illnesses following Hot tub usage to us immediately. This is extremely important if pneumonia-like symptoms are experienced.

It is very important that the Hot tub is NEVER switched off at the mains switch (even if you are not using it).

Chemical Sanitising Dispenser- before anyone enters the tub please remove the floating sanitising dispenser that will be in the tub. Please remember to replace the dispenser to the tub when you exit and carefully close the hot tub cover.

Risk to children – Extreme caution must be exercised to prevent unauthorised access by under age children. The hot tub cover must remain closed at all times unless a responsible adult is present.

No children under 4 years old are permitted in the tub, as they cannot regulate their body temperatures suitably. All children under 16 using the hot tub must be supervised by a responsible adult at all times. Instruct your children to shower and visit the toilet prior to use of the tub and inform them to keep their heads out of the water (especially mouth and ears).

Remind everyone that wet surfaces (particularly slate) can be very slippery. Make sure everyone takes care entering and leaving the tub.

- Do not jump into the hot tub.
- People with infectious diseases should not use the tub.
- We recommend 'Speedo' type clothing as normal clothes have detergent in them that will cause a chemical imbalance.
- **Do not stand on the tub cover.** £400 to replace!
- The use of drugs, alcohol or medication before or during tub use, may lead to a danger of drowning.
- Persons using medication should consult their doctor before using the tub. Some medications may cause drowsiness, do not use the tub if your medication induces drowsiness, affects your heart rate, blood pressure or circulation.
- Pregnant women, persons suffering from obesity, heart disease, low or high blood pressure, circulatory problems, or diabetes should consult a doctor before using the tub.
- Prolonged immersion in hot water can result in hyperthermia – a dangerous condition that occurs when the internal body temperature exceeds 37 degrees centigrade. Symptoms include, unawareness of impending hazard, failure to perceive heat, failure to recognise the need to exit the tub, unconsciousness resulting in a danger of drowning.
- Do not use the tub immediately after strenuous exercise.
- Test the water with your hand before entering the tub to make sure it is comfortable.
- Use the clips on the front when the tub is not in use to secure the cover against high winds etc. (whether full or empty)
- Always shower before use, perfumes, hair products, **FAKE TAN** can contaminate the water, and you may be charged for this.
- Do remove the cover completely, use the cover lifter to remove before use.
- Do not attempt to open the electrical box.
- Do not use any glass wear or crockery in the tub. If glassware is broken this will result in the hot tub being drained, cleaned and re filled, for which there will be a £50 charge.
- Do not allow any pets in the tub.
- Do not use detergent or soaps of any kind in the tub.
- Do not drink the water.
- The tub is very deep; do not allow anyone to sleep in it.
- Please treat the tub as if it was your own as maintenance is very expensive.
- Any damage to the cover or tub will need to be paid for.

If you have any questions at all regarding the use of the hot tub, please do not hesitate to contact Mark on 07976 738556 (Mark)
